

Three Homes In Three Days

In June 2014, 84 Lumber and World Trade Director, Mark Reginelli made front page news in Ulaanbaatar, Mongolia by having a “Blitz Build”, by building three model homes in three days. Officials from Ulaanbaatar’s Government administration and TV crews also came and toured the building site.

Each home had its own crew of four Mongolian workers with different levels of carpentry experience and one US supervisor. All building materials in the homes were supplied by 84 Lumber . This “American Style” housing is high quality, adaptable, and is made to last.
